*Message from the editor in Chief

   The year 2022 promises many exciting developments for the Global Journal of Computer Sciences: Theory and Research (GJCS). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: Tirana, Argentina, Turkey, etc.

   The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of " Session Hijacking Vulnerabilities and Prevention Algorithms in the Use of Internet.", "Development of Soft Skills While Learning Numerical Analysis", "Using Parallel Computing to Measure Image Processing on Led Walls on Albania's National Media", "Time-Optimal Trajectory Generation in Joint Space for 6R Industrial Serial Robots Using Cuckoo Search Algorithm". We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributors to this issue.

 Hope to see you in our new issue.

Asist. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Information Technology: Emerging Technologies (GJIT) CHEF EDITOR
