*Message from the editor in Chief

The year 2022 promises many exciting developments for the Global Journal of Computer Sciences: Theory and Research (GJCS). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: Iran, Azarbaijan, Argentina, Cyprus etc.

The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of “Geological domaining at Sungun porphyry copper deposit using Cluster Analysis”, “Designing an Android-based mobile app to address issues with online shopping”, “Tools for Solving Systems of Nonlinear Equations”. We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributorsto this issue.

Hope to see you in our new issue.

Asist. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Computer Sciences: Theory and Research (GJCS) CHEF EDITOR

* ADDRESS OF CORRESPONDENCE: Assist. Prof. Dr. Ezgi Pelin YILDIZ, Kars Kafkas University, Department of Computer Technology
