

**\*Message from the editor in Chief**

The year 2023 promises many exciting developments for the Global Journal of Computer Sciences: Theory and Research (GJCS). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: USA, Cyprus, Brazil, Algeria etc.

The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of "Security Technologies Using Facial Recognition", "What is Cloud Computing? Benefits and challenges of Cloud", "Regulating and testing normative structures for Artificial Intelligence: the possibilities of the Regulatory Living Lab", "Corporate Cyber Security In Turkey Investigation Of Legal And Corporate Infrastructure : A Meta-Synthesis Study". We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributors to this issue.

Hope to see you in our new issue.

**Assoc. Prof. Dr. Ezgi Pelin YILDIZ**

**Global Journal of Computer Sciences: Theory and Research (GJCS) CHEF EDITOR**
