*Message from the editor in Chief

The year 2024 promises many exciting developments for the Global Journal of Computer Sciences: Theory and Research (GJCS). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: Turkey, India

The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; “*Determination of reinforcement diameters of reinforced concrete deep beams with genetic algorithms*”, “*Single server queueing model with Poisson arrival and gamma service time distribution*”, “*Sustainable innovation policy in non-walled technoparks*” .

We will continue to contribute to literature within the scope of Computer Science with our strong team.

Thanks to all our authors the contributors to this issue.

Hope to see you in our new issue.

Assoc. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Computer Sciences: Theory and Research (GJCS) CHEF EDITOR
