*Message from the editor in Chief

Global Journal of Computer Sciences: Theory and Research is an international online journal for scientists and professionals involved in all aspects of computer sciences. This journal serves as an international platform that fosters theoretical and practical issues and new applications for all scientists and professionals from the field of computer sciences including original research and innovative applications from all parts of the world.

The year 2024 promises many exciting developments for the Global Journal of Computer Sciences: Theory and Research (GJCS). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries.

The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of "Determination of reinforcement diameters of reinforced concrete deep beams with genetic algorithms", and "Sustainable Innovation Policy in Non-Walled Technoparks". We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributors to this issue.

Hope to see you in our new issue.

Assoc. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Computer Sciences: Theory and Research (GJCS) CHEF EDITOR
