Message from Editor

Dear Readers,

It is a great honor for us to publish seventh volume, first issue of ***Global Journal of Information Technology: Emerging Technologies***.

Global Journal of Information Technology: Emerging Technologies focuses on contemporary research addressing Information technology including emerging technologies, strategy, change, infrastructure, human resources, sourcing, system development and implementation, communications, technology developments, technology futures, national policies and standards. The journal also publishes articles that advance our understanding and application of research approaches and methods covering information technology, its evolution and future prospects. It is intended to be a multi-disciplinary international journal aimed at revealing results of research on information technology.

The journal seeks to encourage academically robust papers, research, critical reviews and opinions on the organizational, social and management issues associated with significant information-based technologies.

Articles focusing on computer network terms lexicon, social media network for learning, use of social networking tools by students and LSB steganography have been included in this issue. The topics of the next issue will be different. You can make sure that we will be trying to serve you with our journal with a rich knowledge in which different kinds of topics are discussed in each volume and issue.

A total number of seven (7) manuscripts were submitted for this issue and each paper has been subjected to double-blind peer review process by the reviewers specialized in the related field. At the end of the review process, a total number of four (4) high quality research papers were selected and accepted for publication.

We present many thanks to all the contributors who helped us to publish this issue.

Best regards,

Prof. Dr. Dogan Ibrahim
