

Global Journal of Information Technology

Vol 6, No 1 March 2016

Message from the Editor

Dear Readers

It is a great honor for us to publish sixth issue of Global Journal of Information Technology.

Global Journal of Information Technology (GJIT) seeks to encourage academically robust papers, research, critical reviews and opinions on the organizational, social and management issues associated with significant information-based technologies. GJIT focuses on contemporary research addressing Information Technology including strategy, change, infrastructure, human resources, sourcing, system development and implementation, communications, technology developments, technology futures, national policies and standards. It also publishes articles that advance our understanding and application of research approaches and methods covering information technology, its evolution and future prospects.

Big data storage, Kernel principal, shape ship stern, mobile visualization platform, banking system regulation, project based learning, massive sentiment analysis, big data, MIS, cognitive flexibility, software engineering, intelligent trip recommender have been included in this issue. The topics of the next volume will be different. You can be sure that we will continue to include and discuss various topics in our journal in 2016 Volume.

A total number of twenty (20) manuscripts were submitted for this issue and each paper has been rigorously peer reviewed by the reviewers specialized in the related field. At the end of the review process, a total number of thirteen (13) high quality research papers were selected and accepted for publication.

We would like to present many thanks to all the contributors who contributed us to publish this issue.

Best regards,

Prof. Dr. Adem Karahoca
Editor – in Chief
