

*Message from the Editor in Chief

Dear reader,

We are pleased to publish Volume 10 Number 2 (2020) October issue of the Global Journal of Information Technology: Emerging Technologies. This issue aimed to present innovative technologies that could improve the operations of businesses and lead to further innovation in various aspects of human life. After a careful peer review procedure, nine (9) articles were selected that fit the aim of the publication.

The nine articles selected were authored by researchers from Poland, Jordan, United Arab Emirates, Lithuania, Brazil, Portugal, and Iraq. The selected topics include the following: Comparative analysis of clustering techniques in the internet of things; The effectiveness of e-government media by the special region of Yogyakarta's provincial government; Model for technological innovation integration and new product development in firms under innovation discontinuities; Impact of web content on profitability and market share of publishing business in UAE; Cloud computing adoption in small and medium-sized enterprises in Poland's benefit analysis.

Dear reader, we believe that this publication would provide you with extremely useful information on innovative technologies. We would therefore like to commend all the contributors that made this publication a success. Dear reader, enjoy reading!!

Best Regards,

Assist. Prof. Dr. Ezgi Pelin Yildiz,

Kars Kafkas University, Department of Computer Technology,

(Editor-in-chief).
