

***Message from the editor in Chief**

The year 2022 promises many exciting developments for the Global Journal of Information Technology: Emerging Technologies (GJIT). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: Cyprus, Jordan, Iran etc.

The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of "Creating a Mobile Application for Online Shopping that has all the Features Required for the Process", "Requirements For The Use Of E-Learning In University Education (Theoretical Study)", "Attitudes Of Physical Education Teachers In Jordan Towards The Use Of The Internet In The Educational Process", "An Inquest into the Degree of M.A. Translation Students' Familiarity with Computer-Assisted Translation (CAT) Tools". We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributors to this issue.

Hope to see you in our new issue.

Asist. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Information Technology: Emerging Technologies Chief Editor
