

***Message from the editor in Chief**

The year 2023 promises many exciting developments for the Global Journal of Information Technology: Emerging Technologies (GJIT). In addition, every year, the number of citations continues to rise strongly in proportion to the increase in the number of articles published. In this respect, first of all, we would like to thank all our authors who have contributed to the success of our journal. While reviewing our new issue, we saw articles from different authors from different countries: China, Cyprus, Kazakhstan, Turkey etc. The multiculturalism policy followed in our globally-focused journal makes us happy with every new issue. We examine the following research areas in the current issue; The topics of "Information Security for Small Business Course Proposal and Design", "Mobile learning as a new technology in education", "Using a map matching technique, real-time position tracking for security purposes", "Investigation Of Efficient Backup Techniques To Reduce Late In Cloud Systems: A Modeling Study". We will continue to contribute to the literature within the scope of Educational Technologies with our strong team. Thanks to all our authors the contributors to this issue.

Hope to see you in our new issue.

Assoc. Prof. Dr. Ezgi Pelin YILDIZ

Global Journal of Information Technology: Emerging Technologies Chef Editor
